## Call modules:

Under Module, select which module you want to edit and click on it.

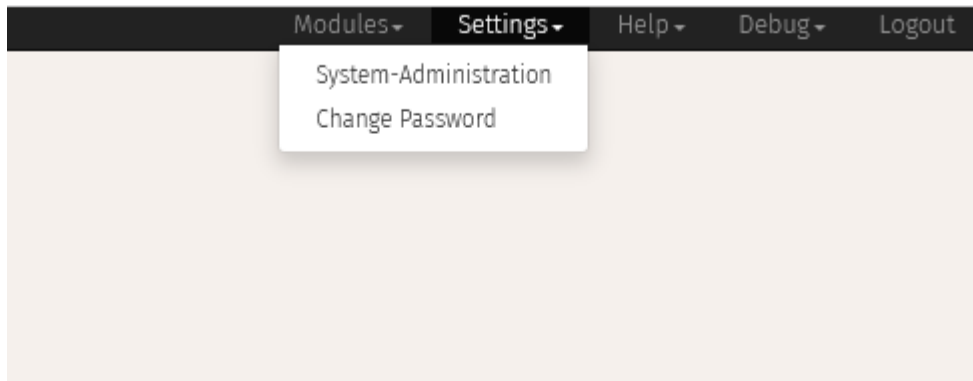

The desired module appears and you can select as many modules as you want, another tab always appears

## Call administration:

You can change the password under Administration, a frequent change of your password increases the protection against unauthorized access. We recommend short, regular intervals.

## Call help:

### Activate / deactivate context help:

Under Help you can activate / deactivate context help. When activated, a yellow explanation / procedure appears for each field in the system.

### First Steps PDF download:

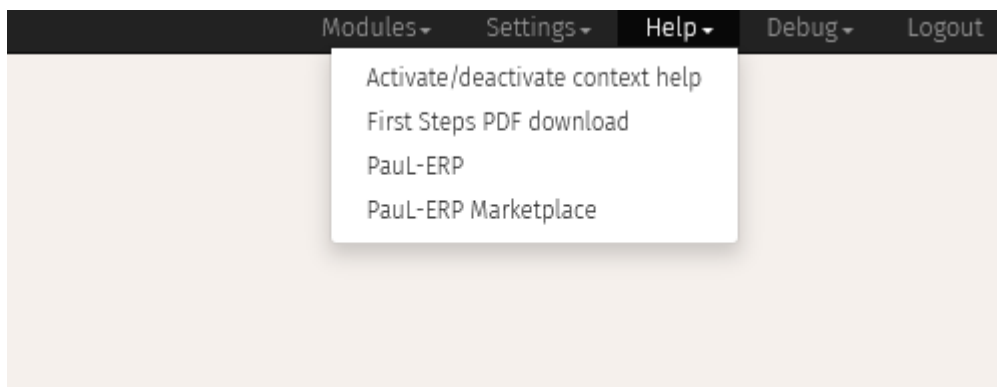

You can select this point to receive a brief introduction to setting up the ERP system. This is to be seen in addition to training by your partner in charge.

### PauL-ERP:

Here you will find the link to the PauL-ERP homepage to inform yourself about news.

### PauL-ERP Marketplace:

Here you will find the link to the PauL-ERP Marketplace to inform yourself about new plugins or modules.

### PauL-ERP Logout:

Log out properly using the logout button. After confirming the security question whether you really want to log out, PauL-ERP is closed.
